Colloid & Polymer Science

Kolloid-Zeitschrift und Zeitschrift für Polymere
Official Journal of the Kolloid-Gesellschaft
Founded by Wolfgang Ostwald 1907,
continued by F. H. Müller, Marburg 1944-1981

Editors:

Prof. Dr. H.-G. Kilian, Abt. für Experimentelle Physik, Universität Ulm, Oberer Eselsberg, D-7900 Ulm

Prof. Dr. A. Weiss, Institut für Anorganische Chemie, Universität München, Meiserstr. 1, D-8000 München 2

Regional Editors:

Prof. Dr. B. Lindman, Physical Chemistry 1, Chemical Center, Lund University, P. O. B. 740, S-220 07 Lund (Sweden)

Prof. Dr. E. Matijević, Institute of Colloid and Surface Science, Clarkson College of Technology, Potsdam N. Y. 13676 (USA)

Prof. Dr. M. Nakagaki, Faculty of Pharmaceutical Sciences, Kyoto University, Sakyo-Ku, Kyoto (Japan)

Prof. Dr. R. H. Ottewill, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS (England)

Editorial Board:

E. W. Fischer-Mainz
R. Hosemann-Berlin/West
H. H. G. Jellinek-Potsdam, N. Y.
G. Kanig-Ludwigshafen
A. Keller-Bristol
J. Koppelmann-Leoben
P. Kratochvil-Prag
H. Lange-Düsseldorf
J. Lyklema-Wageningen
W. Pechhold-Ulm
A. Peterlin-Washington
G. Rehage-Clausthal-Zellerfeld
H. Ringsdorf-Mainz
A. Scheludko-Sofia
E. Wolfram-Budapest
H. Zahn-Aachen

CONTENTS OF VOL. 262 (1984)

Polymer Science

Atkins, E. D. T., M. J. Hill, D. A. Jarvis, A. Keller, E. Sarhene, and J. S. Shapiro: Structural studies on gels from isotactic polystyrene . . . 22

Bandara, U. M. Dröscher, and E. L. Thomas: Solid state extrusion of thermoplastic elastomers 4 – Structure property relationships in solid state extruded block copoly(ether ester) . . . 538

Behari, K., and K. C. Gupta: Aqueous polymerization of methacrylamide initiated by potassiumpersulfate-L-cystein hydrochloride redox system . . . 677

Belavtseva, E. M., E. F. Titova, V. I. Lozinsky, E. S. Vainerman, and S. V. Rogozhin: Study of cryostructurization of polymer systems. V. Electron microscopic studies of cross-linked polyacrylamide cryogels . . . 775

Bergmann, K., H. Schmiedberger und K. Unterforsthuber: Meßverfahren zur Untersuchung der Protonen-Spin-Spin-Relaxation ein- und zweiphasiger Polymerer in einem Zeitbereich von fünf Dekaden . . . 283

Biswas, P. K.: The mechanical and optical properties of oriented fibres of semicrystalline polymers . . . 623

Böchl, G., and A. J. Owen: Electron microscopy of oriented high-density polyethylene: Comparison with smallangle X-ray scattering . . . 793

Bonart, R. und K. Hoffmann: Diskussion der Negativ-Orientierung der Hartsegmente in gedehnten segmentierten Polyurethanen . . . 1

– , F. Boetzl und H. Meyer: Untersuchungen über die thermische Netzwerk Stabilität (TNS) von segmentierten Polyurethanen . . . 89

Bradna, P., and O. Quadrat: Criteria of negative thixotropy of poly-(methyl methacrylate) solutions as a function of temperature and of the thermodynamic quality and viscosity of the solvent . . . 189

Brather, A.: A new formula for the entropy of mixing in polymer systems and free volume . . . 526

Dickinson, E., W. L. -K. Lam, and G. Stainsby: Microviscosity of dilute latex + gelatin dispersions determined by dynamic light-scattering . . . 51

Eastmond, G. C., and D. G. Phillips: On the form and formation of rubber particles in impact polystyrene and their relationship to natural and synthetic materials . . . 627

Enderle, H.-F., H. -G. Kilian, and Th. Vilgis: Irreversible deformation of macromolecular networks . . . 696

Engeln, I., R. Hengl, and G. Hinrichsen: Thermal expansion and Young's modulus of uniaxially drawn poly(tetraflouroethylene) in the temperature range from 100 to 400 K . . . 780

Escleine, J. M., B. Monasse, E. Wey and J. M. Haudin: Influence of specimen thickness on isothermal crystallization kinetics. A theoretical analysis . . . 366

Fleischer, G.: A pulsed field gradient NMR study of diffusion in semicrystalline polymers: self-diffusion of alkanes in polyethylenes . . . 919

Franke, H., H. G. Festl, and E. Krätzig: Light induced refractive index changes in PMMA films doped with styrene 213

Fronk, W., B. Heise, B. Neppert, H.-R. Schubach, and W. Wilke: Dynamical SAXS investigations on oriented polyethylene by synchroton radiations: reversible variation of superstructure . . . 99

Gross, B., R. Gerhard-Multhaupt, K. Labonte, and A. Berraissoul: Current and charge deposition in polyethyleneterephthalate (PETP) irradiated with 10–50 keV electrons . . . 93

Güven, O., and F. Yigit: Hydrophilic and hydrophobic interactions in alcohol solutions of high molecular weight poly(n-vinyl-2-pyrrolidone) . . . 892

Hopfenmüller, M. K. und D. Göritz: Die Volumenaufweitung beim uniaxialen Dehnen gefüllter Netzwerke . . . 177

Huda, M. N., S. Bauer, H. Dragaun and P. Skalicky: Qualitative analyses of molecular structure of polypropylene fibres on the basis of X-ray diffraction patterns . . . 110

Hudecz, F., P. Kovács, S. Kutassi-Kovács, and J. Katjár: GPC, CD and sedimentation analysis of poly-Lys and branched chain poly-Lys-poly-DL-Ala polypeptides . . . 208

van Hutten, P. F., C. E. Koning, and A. J. Pennings: The deformation behaviour of polyethylene shish-kebabs produced by stirring-induced crystallization . . . 521

Illers, K. -H., W. Heckmann und J. Hambrecht: Untersuchung des Mischungsgleichsgewichts binärer Polymermischungen – I. Mischungen aus Polystyrol und Tetramethyl-bisphenol A-Polycarbonat . . . 557

Jańczak, W., and G. Tadych: Influence of exudation on the properties of PVC platicized with blends of phthalate and chlorinated paraffin . . . 122

Kawaguchi, A., S. Isoda, J. Petermann, and K. Katayama: High resolution electron microscopy of $(SN)_x$ . . . 429

– , T. Ichida, S. Murakami, and K. Katayama: Thickening process of polyehtylene single crystals at an early stage of annealing . . . 597

Kilian, H.-G., and Th. Vilgis: Fundamental aspects of rubber-elasticity in real networks . . . 15

– : Small-strain elastic moduli of quasi-isotropic semicrystalline eutectoid copolymers and aspects of universality . . 374

– , and Th. Vilgis: Thermodynamics of irreversible processes in systems with a „non-Hookain" strainenergy function . . . 691

Klemmer, N. und B. -J. Jungnickel: Über eine kristallisationskinetische Anomalie in Mischungen aus Polyethylen und Polyoxymethylen . . . 381

Kock, H. J., and G. Rehage: Photoelasticity and structure of PMMA networks . . . 182

Kratky, O., and H. Stabinger: X -ray small angle camera with block-collimation system an instrument of colloid research . . . 345
Kricheldorf, H. R., and D. Müller: Secondary structure of peptides 16th. Characterization of proteins by means of ^{13}C NMR CP/MAS spectroscopy . . . 856
Kudrna, M., J. Makovský, and M. Krejči: Mechanical anisotropy of a monoaxially drawn polypropylene film . . . 301
Kulicke, W.-M. und N. Böse: Bestimmung der Molmassenverteilung sowie der Stabilitätsgrenze von Polyacrylamiden unter Benutzung einer kombinierten Ausschlußchromatographie/Kleinwinkel-Laser-Streulichtphotometer Anlage . . . 197
Kumakura, M., and I. Kaetsu: Polymeric microspheres by radiation copolymerization of acrolein and various monomers at low temperatures . . . 450
Labib, M. E., and R. Williams: The effect of processing additives on the surface properties of polyvinyl chloride . . 551
Laun, H. M.: Orientation effects and rheology of short glass fiber-reinforced thermoplastics . . . 257
Litowska, M., and N. Narebska: Hydration of synthetic polydialkylphosphate (PPF) – a simplified model for natural teichoic acids – Part 1. Nuclear magnetic relaxation studies of PPF gels . . . 455
– :Hydration of synthetic polydialkylphosphate (PPF) – a simplified model for a natural teichoic acids – Part 2. Selfdiffusion coefficients of water in PPF gels . . . 461
Lokhande, H. T., and M. D. Teli: Grafting onto polyester fibres – VI. Zeta potential of polyester fibres containing acrylic acid-acrylamide grafts . . . 127
Lozinsky, V. I., E. S. Vainerman, G. F. Korotaeva, and S. V. Rogozhin: Study of cryostructurization of polymer systems – III. Cryostructurization in organic media . . . 617
– , E. S. Vainerman, E. F. Titova, E. M. Belavtseva, and S. V. Rogozhin: Study of cryostructurization of polymer systems. IV. Cryostructurization of the system: Solvent–vinyl monomer–divinyl monomer–initiator of polymerization . . . 769
Mächtle, W.: Schnelle dynamische H_2O/PERCOLL-Dichtegradienten für Mikropartikel in der analytischen Ultrazentrifuge . . . 270
Martinez-Salazal, J., and F. J. Baltá Calleja: A study of diffractometer line shapes in melt crystallized polyethylene . 361
Masegosa, R. M., M. A. Llorente, M. G. Prolongo, I. Hernández-Fuentes, and A. Horta: Swelling equillibrium and preferential sorption of crosslinked poly(methyl methacrylate) in the mixture acetonitrile + ν-butanol . . . 862
Misra, T., K. C. Patra, and T. Patel: Small-angle X -ray study of air-dried elastoidin using three – and one – dimensional correlation functions obtained from slit–smeared intensity . . . 611
Mucha, M.: Isothermal thermogravimetric studies of molten diacetate terminated polyoxymethylene in nitrogen an air 851
– : Thermooxidation rate of diacetate terminated polyoxymethylene with various morphological structures . . . 841
Nedeltscheva, M. P., St. Mladenova und E. T. Valtcheva: Thermodynamik des Adsorptionsprozesses von Polyamidamin an Zellstoff . . . 635
Odell, J. A., A. Keller, and M. J. Miles: Designing high-modulus polyethylene with lamellar structures . . . 683
Ostrowska, J. and Anna Nareü9bska: Infrared study of hydration and association of functional groups in a perfluorinated Nafion membrane – Part 2 . . . 305
Patnaik, L. N., S. P. Rout, N. C. Samal, M. Senapati, R. Mishra, and M. K. Rout: Substituent effects in the reaction between acetophenones and polyacrylonitrile readicals . . .
Pérez, E., J. G. Fatou, and A. Bello: Crystallization kinetics of the monoclinic modification of poly (3,3-dimethyl oxetane) . . . 119
– , A. Bello, and J. G. Fatou: Effect of molecular weight an temperature on the isothermal crystallization of poly(oxetane) . . . 605
Petermann, J. and J. M. Schulz: Electron microscope observations of fibrillar-to-lammellar transformations in melt-drawn polymers. II. Polybulene-I . . . 217
Privalko, V. P., Yu. S. Lipatov, N. L. Nedrya, G. V. Titov, and G. I. Khmelenko: Chain length effect on the crystal thermal stability of oligoesters crystallized in thin layers . . . 9
Ruland, W.: Free vibration of viscoelastic materials with high damping . . . 387
Sakamoto, R.: Phase separation of poly(γ-benzyl L-glutamate) to liquid crystal and isotropic solution in various helicogenic solvents . . . 788
Samal, R. K., S. C. Satrusallya, P. K. Sahoo, S. S. Ray, and S. N. Nayak: Reaction of water soluble polymers with oxidising agents: 1. reaction of dextran with tetravalent cerium . . . 939
Schinker, M. G., L. Könczöl, and W. Döll: Micromechanics of fatigue crack propagation in glassy thermoplastics . 230
Schneider, W. A., and J.-H. Wendorff: Physical mechanism of the electrical of polyethylene terephathalate . . . 761
Schultz, J. M. and J. Petermann: Transmission electron microscope observations of fibrillar-to-lamellar transformations in melt-drawn polymers – I. Isotactic polypropylene . . . 294
Siesler, H. W.: Rheo-optical Fourier-transform infrared (FTIR) spectroscopy of polymers – 5. Strain-induced crystallization of crosslinked natural rubber . . . 223
Simionescu, Cr., S. Dumitriu, M. Popa, M. Dumitriu, and D. Hritcu: Bioactive polymers. XV. Hydrolases immobilized on Biozan R. . . . 705
Smook, J. and J. Pennings: Influence of draw ratio on morphological and structural in hot drawing of UHMW polyethylene fibres as revealed by DSC . . . 712
Springer, H., R. Neuert, F. D. Müller, and G. Hinrichsen: Orientation analysis of uniaxially drawn polycarbonate films, doped with fluorescent molecules, by UV-dichroism, fluorescence polarization and birefringence . . . 46

Stadler, R. and W. Gronski: Diffuse phase boundary in blockcopolymers-comparison of mechanical model results with thermodynamic theory . . . 466
Sumita, M., T. Ookuma, K. Miyasaka, and K. Ishikawa: Mechanical properties of oriented polyvinylchloride composites filled with ultrafine particles . . . 103
Theocaris, P. S., V. M. Startsev, and N. F. Chugunova: A ductile-brittle zone in polyimides depending on the reaction temperature . . . 867
– : On the evaluation of adhesion between phases in fiber composites . . . 929
Tidick, P., S. Fakirov, N. Avramova, and H. G. Zachmann: Effect of the melt annealing time on the crystallization of nylon-6 with various molecular weights . . . 445
Tsuji, M. and R. St. Manley: Image analysis in the electron microscopy of cellulose protofibrils . . . 236
Vogel, W., E. Ferracini, A. Ferrero, and V. Malta: A X-ray line profile study on as-polymerized isotactic polypropylene . . . 885
Wasiak, A. and W. Wenig: Small angle X-ray studies on the core crystals in oriented polypropylene/polybutene-1 blends . . . 435
Wölfle, A. and J. Springer: Structure and properties of macromolecules in shearflow. 4th communication: a high resolution laser light scattering photometer for rheooptical measurements . . . 879
Würflinger, A.: Conformational properties of η-alkanes . . . 115
Zhang, H. Z., K. Sekine, T. Hanai, and N. Koizumi: Dielectric approach to polystyrene microcapsule analysis and the application to the capsule permeability to potassium chloride . . . 513

Colloid Science

Abe, M., M. Ohsato, and K. Ogino: Interaction between anionic surfactants and oil dye in the aqueous solutions–IV. The effect of alkyl chain length in sufactant molecule on the protonation equilibrium of azo dye . . . 657
–, N. Tsubaki, and K. Ogino: Solution properties of mixed surfactant systems (IV) – The effect of alkyl chains in nonionic surfactant on electric properties of anionic-nonionic surfactant systems . . . 584
Albert, A. and J. Cordoba: Pure and mixed monolayers of poly-L-methionine and poly-γ-methyl-L-glutamate with 1,2 diolevl-L-α-phosphatidycholine at air-water interface . . . 811
Aoki, K., S. Sakurai, M. Murata, T. Ito, H. Terada, and K. Hiramatsu: Studies on components 1′ (modified monomere) and 2 (dimer) formed during heat-treatment of bovine serum albumin . . . 470
Bánhegyi, G.: Computer simulation of interfacial polarization in stratified dielectric systems. I. Bilayer dielectric, time and frequency domains . . . 956
–: Computer simulation of interfacial polarization in stratified dielectric systems. II. Bilayer dielectric, temperature domain . . . 967
Blom, C., J. Mellema, J. S. Lopulissa and A. J. Reuvers: Frequency dependent linear viscoelastic properties of ordered polystyrene latices . . . 397
Chevalier, Y. and C. Chachaty: NMR investigation of the micellar properties of monoalkylphosphates . . . 489
Dörfler, H. -D., S. Diele und M. Diehl: Strukturbildung von homologen wasserfreien Lecithinen in Abhängigkeit von Temperatur und Kristallisationsbedingungen . . . 131
–, S. Diele und M. Diehl: Strukturbildung von homologen Lecithin-Monohydraten in Abhängigkeit von Temperatur und Vorgeschichte der Lecithine . . . 139
Doxastakis, G. and P. Sherman: The interaction of sodium caseinate with monoglyceride and diglyceride at the oil-in-water emulsions and its effect on emulsion stability . . . 902
Eisenlauer, J.: A critical reappraisal of recent communications on the hydrodynamic characterization of silica (aerosil) hydrosols . . . 906
Eshuis, A. and J. Mellema: Viscoelasticity and microstructure of non-ionic microemulsions . . . 159
Gotoh, K., T. Inoue, and M. Tagawa: Adhesion of nylon particles to a quartz plate in an aqueous and their removal by electroosmosis . . . 982
Hayter, B., M. Hayoun, and T. Zemb: Neutron scattering study of phenatol solubilization in sodium octanoate micells . . . 798
Imae, T. and S. Ikeda: Rodlike micelles of dimethyloleyamine oxide in aqueous NaCl solutions, and their flexibility and size distribution . . . 497
Ishikawa, A., T. Hanai, and N. Koizumi: Dielectric properties of quaternary ammonium ion-exchange beads disperse in aqueous phases . . . 477
Kawai, T., J. Umemura, and T. Takenaka: Fourier transform infrared and micelle formation of sodium *n*-alkane-sulfonates in aqueous solution . . . 61
Kratohvil, S., E. Matijević, and M. Ozaki: Precipitation phenomena in $FeCl_3$-NaH_2PO_2 aqueous solutions at 245°C
Lunkenheimer, K., R. Miller, G. Kretzschmar, K. H. Lerche, and J. Becht: Investigations on the possibility of purifying surfactant solutions by adsorption on solids . . . 662
Marković, I., R. H. Ottewill, D. J.Cebula, I. Field, and J. F. Marsh: Small angle neutron scattering studies on nonaqueous dispersions of calcium carbonate – Part I. The Guinier approach. . . . 648
McArdle, C. B., and H. S. Blair: The behaviour and photoresponses of some indolinospiropyrans in monomolecular films . . . 481
Molski, A.: On the use of the Knudsen number and aerosol Knudsen number in the kinetics of Brownian coagulation of aerosols . . . 403

Motomura, K., M. Yamanaka, and M. Aratono: Thermodynamic consideration of the mixed micelle of surfactants . 948
Motschi, H. and M. Rudin: ^{27}Al ENDOR study of VO^{2+} adsorbed on δ-alumina – Direct evidence for inner sphere coordination with surface functional groups . . . 579
Ozeki, S. and S. Ikeda: The sphere-rod transition of micelles dodecyldimethylammonium bromide in aqueous NaBr solutions, and the effects of counterion binding on the micelle size, shape and structure . . . 409
Pan, H. K., G. S. Knapp, and S. L. Cooper: EXAFS and XANES studies on Zn^{2+} and RB^{+} neutralized perfluorinated ionomers . . . 734
Peled, A.: Volume photodeposition processes in amorphous selenium hydrosols . . . 817
Rettig, W., Chr. Koth und H. -D. Dörfler: Kompressionsverhalten und Gleichgewichtsspreitungsdrücke binärer monomolekularer Dimyristoylkephalin/Dilauroylkephalin-Mischungen . . . 747
Reuther, F., G. Damaschun, Ch. Gernat, F. Schierbaum, B. Kettlitz, S. Radosta, and A. Nothnagel: Molecular gelation mechanism of maltodextrins investigated by wiede-angle X-ray scattering . . . 643
Sabbadin, J. and J. François: Study of the system „partially hydrolyzed polyacrylamidesodium dodecyl sulfate" in the presence of salts of divalent metals . . . 146
Sakamoto, M., and Y. Kuroyanagi: Conformational studies of multichain copoly α-amino acids)s in solution . . . 418
Sasaki, S.: Effect of simple electrolytes on the hydrodynamic radius of polystyrene latex . . . 406
Seki, T., J. Komiyama, T. Iijima, U. P. Wild: The interaction of dansyl amino acids with bovins serum albumin . . . 311
Senō, M., H. Noritomi, Y. Kuroyanagi, K. Iwamoto, and G. Ebert: Conformational studies of basic poly(α-amino acid)s in reversed micelles . . . 727
–, H. Noritomi, Y. Kuroyanagi, K. Iwamoto, and G. Ebert: Conformational studies of poly (N^5-ω-hydroxyal-kyl-L-glutamine)s . . . 896
Shenoy, A. V.: A Review on drag reduction with special reference to micellar systems . . . 319
Shirahama, K., M. Thodo, and M. Murahashi: ESR linewidth broadening of a hydrophobic probe in some surfactant solution . . . 978
Stuart, M. A. C., F. H. W. H. Waajen and S. S. Dukhin: Electrokinetik effects of adsorbed neutral polymers . . . 423
Tramai, H., A. Iida, and T. Suzawa: The surface characterization of styrene-acrylamide copolymer latex particles and their deposition onto fibers . . . 77
Tong, H., Isao Noda, and C. C. Gryte: Formation of anisotropic ice-agar composites by directional freezing . . . 589
Volke, K., G. Para, J. Pawlikowska-Czubak, and H. Neubert: Flotation and adsorption investigations of the system *n*-dodecanoic acid/mercury at different pH values . . . 245
Vollhardt, D., J. Richter-Mendau, and M. Wittig: Evidence of lateral surface structure changes in transferred multilayer systems by electron microscopy . . . 566
–, M. Wittig, H. Maulhardt, and D. Kunath: FTIR spectroscopic studies of layer systems transferred onto germanium supports . . . 574
Vringer, de T., J. G. H. Joosten, and H. Junginger: Characterization of the gel structure in a nonionic ointment by small angle X-ray diffraction . . . 56
Wüstneck, R.: An experimental study of the surface rheology of adsorbed protein layers . . . 821
–, H. Hermel und G. Kretzschmar: Beeinflussung der Oberflächeneigenschaften des Systems Gelatine + Tensid durch die Art der Gelatine . . . 827
–, V. V. Krotov und M. Ziller: Zum Scherverhalten unzerstörter adsorbierter tensid-modifizierter Gelantineschichten . . . 67
Yamanaka, M., M. Aratono, K. Motomura, and R. Matuura: Effect of pressure on the adsorption and micelle formation of aqueous dodecyltrimethylammonium chloride solution-hexane system . . . 338
Zhang, Y. and E. Matijević: Stability of monodispersed hematite sols in the presence of citric acid . . . 723
Zradba, A. et M. Clausse: Systeme eau/surfactant ionoque/alcool/hydrocarbure. Influence de la nature de l'alcool sur la configuration du Domaine de microémulsion er less propriétes de transport des microémulsions . . . 754

Short Communication

Corno, C., E. Platone, and S. Ghelli: ^{13}C NMR analysis of polyoxyethylenated surfactants – determination of critical micellar concentration . . . 667
Friberg, E. and M. Podzimek: A non-aqueous microemulsion . . . 252
Jiang, C. -Y. and J. E. Mark: The effect of relative humidity on the hydrolytic precipitation of silica into an elastomeric network . . . 758
Müller, H. J., K. Lunkenheimer, N. Kuehn, C. Schmidt und U. Lüdicke: Über die Stabilität dünner Wasserfilme auf Materialien für Offset-Druckplatten . . . 83
Spei, M.: The microfibrillar swelling of α-keratins . . . 507
–: Time-dependent deposition of anionic detergents in α-Keratins . . . 596
Tang, M. -Y., A. Letton, and J. E. Mark: Impact resistance of unifilled and filled bimodal thermosets of poly (dimethylsiloxane) . . . 90
Zoller, P.: Comments on: High pressure dilatometry on polybutene-1 . . . 171

Book Reviews . . . 87, 173, 254, 343, 427, 510, 671, 834, 912

Announcements . . . 86, 172, 342, 670, 833, 911

Correction . . . 509
